## Michigan Internet & Telecommunications Alliance

*Connecting Michigan to the World*

December 2, 2009

Dear Chairman Mayes and Vice Chairman Horn;

We would like to extend our appreciation to each of you and all the Energy & Technology Committee members for taking an extraordinary amount of time to understand the complex telecommunications issues during these difficult times. We have reviewed the most recent version of the H-5 substitute and appreciate the opportunity to provide feedback.

After careful review, we hold steadfast in our belief that HB 4257 in its current form would hurt telecom competition in Michigan. In this fractured Michigan economy, it's already difficult for high-tech companies to make ends meet, but HB 4257 would make even more difficult. It would require CLEC's to lower the rates that long distance companies pay CLEC's to use their networks by requiring the CLEC's to match the rates of companies like AT&T and Verizon which have huge economies of scale which CLECs don't have. We believe passage of this bill in its current form would cost Michigan CLEC's millions of dollars in lost revenue and undoubtedly force many to layoff workers, or worse, go out of business. Equally important, it would give thousands of CLEC customers like businesses, schools, and hospitals less of a choice in choosing their telecom provider. Less choice to customers means higher telecom rates for everyone across Michigan.

Competitive telecom companies are exactly the high-tech industry that Michigan needs to attract, not discourage. These companies are aggressively installing fiber optics throughout the state, interconnecting school districts and bringing the internet to rural areas where it was not available before. Also, in its current form, HB 4257 not only costs CLEC's revenue, but also forces them to pay into a fund that makes other telecom providers 'whole', while the CLEC's do not get to benefit from the fund they are contributing to.

We request that the committee consider an amendment which would accommodate our concerns. Instead of requiring CLEC's to set their 'access rates' at the same level as the giant telecom companies, we suggest an amendment that would allow CLEC's to set their rates at the state-wide average of 'eligible providers' as defined in the bill.

It is for these reasons that we must continue to oppose HB 4257 in its current form. We ask you and the rest of the committee members to consider amendments to the bill which will address these concerns. We are hopeful that once policymakers recognize the extremely negative impact this bill would have on telecommunications competition in our state that you will work with us to alleviate this impact so that Michigan will continue to be a leader in telecommunications policy. Please do not hesitate to contact me with any questions you may have.

Sincerely,

  
John Liskey

# **Michigan Internet & Telecommunications Alliance**

*Connecting Michigan to the World*

## **SAVE TELECOM COMPETITION IN MICHIGAN**

### **HB 4257 would hurt telecom competition in Michigan**

#### **Don't make it harder for competitive telecom carriers to survive.**

It's difficult enough to for high-tech companies to survive in this economy. But this bill would make it harder. It would require CLECs to lower the rates that long distance companies pay them to use their network by requiring the CLECs to match the rates of huge companies like AT&T and Verizon which have huge economies of scale that the CLECs don't have. This would cost Michigan CLECs millions of dollars in lost revenue and undoubtedly put some out of business resulting in layoffs. Just as important, thousands of CLEC customers like businesses, schools and hospitals would have less choice.

#### **Less choice means higher telecom rates for everyone.**

#### **Don't risk losing high-tech jobs.**

Competitive telecom companies are exactly the high-tech industry that Michigan needs to attract not discourage. These are the companies that are installing fiber optics and bringing the Internet to rural areas.

#### **Support amendments that would treat CLECs fairly**

Instead of requiring CLECs to set their "access rates" to the same level as the giant telecom companies, the bill should be amended to allow CLECs to set their rates at the statewide average of the "eligible providers" defined.

As the bill is currently drafted, not only do CLECs lose revenue but they have to pay into a fund that makes other telecom providers "whole."

Steven A. Transeth  
COMMISSIONER

STANLEY "SKIP" PRUSS  
DIRECTOR

June 2, 2009

Honorable Jennifer Granholm  
Governor of Michigan

Honorable Members of the Senate Energy Policy and Public Utilities Committee  
Secretary of the Senate

Honorable Members of the House Energy and Technology Committee  
Clerk of the House of Representatives

The enclosed annual report, *Status of Telecommunications Competition in Michigan*, is submitted on behalf of the Michigan Public Service Commission (Commission) in accordance with Section 103 of the Michigan Telecommunications Act (MTA). This report, as well as reports from previous years, is available on the Commission Web site at [www.michigan.gov/mpsc](http://www.michigan.gov/mpsc). The purpose of this report is to describe the status of competition in telecommunications services in Michigan, including, but not limited to, the toll and local exchange markets in the state. The report includes information on the traditional wireline industry as well as services provided via diverse telecommunications technologies, such as wireless and Voice over Internet Protocol (VoIP). The report also contains information regarding high speed Internet lines in Michigan.

In a trend that began in 2002, the total number of wirelines in Michigan has again decreased. For 2008, the total number of wirelines in Michigan decreased by over 600,000 lines from the previous year. In 2005 and 2006, as noted in earlier reports, there was a decrease in the percentage of lines served by competitive providers, however in 2007 the competitive providers' market share increased. For 2008, the competitive providers' share remained stable at 20 percent.

While competitive providers can offer service to customers through a variety of methods that use the incumbent providers' networks, in 2008 we again saw a large increase, from 25.1 percent to 32.5 percent, in the percentage of competitive lines served via the competitive providers' own facilities. This growth suggests that the competitive network infrastructure is, in fact, continuing to shift toward facilities-based competition versus competition reliant solely on the incumbents' networks. As in 2007, this trend is more evident in residential lines, as almost three fourths of the lines provided via CLEC facilities are residential customers. The percentages of residential versus business lines provided by CLECs via the incumbents' network are more balanced. Though the competitive market share is still below the 2004 high of 27.5

June 2, 2009

Page 2

percent, the continued network investment by competitive providers, along with the stable market share for CLECs over the past two years, is a very positive trend.

While the Commission does not have jurisdiction over most types of advanced and non-wireline telecommunications, additional data available to the Commission allows for the monitoring of developments in these markets. The number of wireless subscriptions in Michigan continues to increase; the FCC reports that there are over 7.6 million wireless subscriptions in Michigan as of December 31, 2007. High speed Internet connections have also increased substantially; over one million additional lines were reported to the FCC for the 12 month period between December 31, 2006 and December 31, 2007. This increase brings Michigan's total high speed lines to just over 3.5 million as of December 31, 2007. Along with monitoring FCC data regarding high speed lines in Michigan, the Commission has taken an active role in the proceedings surrounding the broadband provisions of the American Recovery and Reinvestment Act of 2009 (ARRA), in the first half of this year. The Commission expects to be able to comment more comprehensively on the broadband provisions of the ARRA and any resulting effects on Michigan's telecommunications market in next year's report.

The *Status of Telecommunications Competition in Michigan* report for 2008 shows that, while the total number of wirelines continues to decrease, competitive providers are maintaining a 20 percent market share. Additionally, competitive providers are serving more lines via their own facilities. This represents continued investment in Michigan's competitive telecommunications infrastructure despite the weakened economy and serves as an indication that the provider has the intent of remaining in the marketplace in the long term. The Commission will continue to strive to meet its obligations under the MTA to ensure a just and reasonable primary basic local exchange service rate; enforce basic consumer protections, including prohibitions against slamming and cramming; and resolve disputes that arise under the MTA. At the same time, the Commission is committed to monitoring developments in the wireless and broadband realms and any resulting impacts on the competitive landscape in Michigan. The Commission will also apprise the Governor and the Legislature of any future developments that may warrant action.

Very truly yours,

Orjiakor N. Isiogu, Chairman

Monica Martinez, Commissioner

Steven A. Transeth, Commissioner
